

# FRANCE

## **French Institute of Petroleum (IFP)**

### **MSc (2 years)**

- a. Energy and products
- b. Energy and markets
- c. Petroleum Economics and Management
- d. Energy and Processes
- e. Processes and Polymers
- f. Petroleum Geosciences
- g. Reservoir Geoscience and Engineering
- h. Petroleum Engineering and Project Development
- i. Petroleum Data Management

## **University of Grenoble**

### **MSc (2 years)**

- a. Applied Mechanics
- b. Civil Engineering
- c. Mechanical Engineering
- d. Fluid Mechanics and Energetics
- e. Advanced Mechatronics
- f. Environmental Fluid Mechanics
- g. Chemistry
- h. Biochemistry
- i. Polymers for Advanced Technology

## **University of Lyon**

### **MSc (2 years)**

- a. Synthesis, Catalysis and Sustainable Chemistry
- b. Instrument Development for Micro and Nanotechnologies
- c. Renewable Energy and Efficient Management of Electrical Energy

### **PhD (3 years)**

- a. Materials
- b. Chemistry; Environment; Processes.
- c. Computer Science and Mathematics
- d. Physics and Astrophysics
- e. Electronics, Electrical Engineering, Automation
- f. Mechanical Engineering, Energetics, Civil Engineering and Acoustics
- g. Materials and process engineering

## **University Pierre et Marie Curie (UPMC)**

### **MSc (2 years)**

- a. Master of Physics and Applications
- b. Master of Engineering
- c. Master of Chemistry
- d. SDUEE specialty Ocean, Atmosphere, Climate and Remote Sensing
- e. Informatics specialty Networks
- f. Fluid mechanics, foundations and applications

### **PhD (3 years)**

- a. Physical and analytical chemistry
- b. Mechanical Engineering
- c. Environmental sciences
- d. Geosciences, natural resources and environment
- e. Process Engineering
